### *In This Issue: Digital Democracy: Civic Engagement in the Twenty-First Century*

NOTE FROM THE PRESIDENT 203  
*Christopher T. Gates*

#### ARTICLES

Civic Renewal and the Commons of Cyberspace 205  
*Peter Levine*

Cyberspace bears a resemblance to the commons of medieval England or American colonial society. In both settings, shared stewardship generates social capital. However, left unchecked, modern “enclosure” movements may fence in the virtual frontier.

Access for All: Public Library Contributions to Civic Connectivity 213  
*Danielle Patrick Milam*

Public libraries are on the front line, bridging the digital divide and wiring communities for civic engagement. Across the country, innovative programs leveraging support from foundations and the public and private sectors are helping individuals and communities become e-literate.

If E-Democracy Is the Answer, What’s the Question? 221  
*John D. Nugent*

The forms and processes of representative democracy may change as the irresistible force of Internet access meets the unmovable object of American government. To date, however, the encounter has largely complemented rather than revolutionized existing practices.

The Politics of E-Gov: The Upcoming Struggle for Redefining Civic Engagement 235  
*Costis Torgas*

E-government has the potential to make the relationship between citizens and government more citizen-centric. It is essential that normative concerns, including trust and equity, inform the process whereby digital democracy takes shape.

The Virtual State: Transforming American Government? 241  
*Jane E. Fountain*

The move from paper-based transactions to digitized operations will result in tremendous efficiencies throughout all levels of government. It will also increase citizen access and change existing forms of civic participation. This article takes a look ahead to the transformations in government structure that the virtual state may entail.

- CitiStat and the Baltimore Neighborhood Indicators Alliance:  
Using Information to Improve Communication and Community  
*Marsha R. B. Schachtel* 253
- On the streets of Baltimore, e-governance is becoming a reality. By bringing administrative data together with highly detailed GIS maps, the city of Baltimore is increasing the efficiency of service delivery across government departments. A neighborhood-focused alliance is also using information technology to support residents' efforts to strengthen and build community.
- Unraveling the Community Genome: What Makes Civil  
Society Work? 267  
*Suzanne W. Morse*
- Rejuvenating civil society requires paying attention to how communities are working today. This article identifies ten elements of successful communities and considers ways to strengthen them.
- Collaboration Through Network Structures for Community  
Building Efforts 279  
*Myrna P. Mandell*
- Network structures connecting governments, the private sector, and nonprofit organizations have become increasingly common. This changing world of governance requires new skills and strategies on the part of public managers.
- Building Better Citizens: Increasing the Level of Civic  
Education Among Teens in Jacksonville, Florida 289  
*Pamela Zeiser*
- An innovative program reaches out to disadvantaged students to improve their citizenship skills and increase their interest in civic awareness.
